For Immediate Release

MONTH DATE, 2001 - Minneapolis, MN

According to the National Institutes of Health, **15%**, or **1 out of 7** individuals in our country, suffers from some sort of learning disability.

Therefore, did you know that in our Twin Cities seven county metro area, up to **374,000** people possibly have a learning disability – including **72,487** school-age children?

Learning disabilities concern our communities.

For 34 years, LDA Learning Center has been serving the needs of the community by providing quality educational services for people with learning disabilities. Located in Minneapolis, LDA Learning Center is a private, nonprofit agency helping children, youth and adults with learning disabilities and related learning difficulties maximize their potential so that they may lead more productive fulfilled lives. LDA services include educational evaluations, one to one and small group tutoring, consultations, family literacy activities in area schools and communities, school-to-work transition programming for high school students, professional training, public education, and high quality educational products. **Today, LDA is the Twin Cities' leading nonprofit educational agency for people of all ages with learning disabilities.**

We are always looking for **partnership** opportunities to educate the community about the importance of early detection of learning disabilities, key warning signs for parents, educators, and employers, and the services we offer to the community. Our staff is readily available to offer expert information, to share a success story, to set up an interview with a current client, or to explore any other possibilities. Please keep us in mind for such an opportunity. LDA Learning Center is an **expert resource** on this issue and we encourage local media to get involved in our effort to increase awareness about learning disabilities.
